

CURRICULUM VITAE

Paul Hadjikyriacou

MPhil MRes (Contaminated Land Management) MPhys(Hons) AIEMA MInstP

Discipline:	Physics and Contaminated Land
Technical Education:	University of Nottingham University of Liverpool University of Salford
Qualifications:	MRes in Contaminated Land Management (2007) MPhil in Nuclear Structure Physics (2002) MPhys in Physics (2000) CSCS Site Operative (2007)
Memberships:	Member of the Institute of Physics Associate member of the Institute of Environmental Management & Assessment Associate member of the Institute of Civil Engineers

Experience

Paul has worked in the geotechnical/geo-environmental sector for over 15 years. In this time he has acquired extensive experience and knowledge in; site investigation techniques, laboratory analyses and methods, site supervision and coordination, factual and interpretive reporting, assessment of risk to human health, built environment and the wider environment with regard to soil, water and gas contamination. Paul also has experience in developing remediation strategies and overseeing the site completion / validation.

An outline summary of Paul's relevant experience is set out below:

- Management of numerous projects including compiling desk study reports, management, coordination and supervision of site investigations and undertaking in situ fieldwork.
- Report compilation: responsible for the collation of historical, environmental, geological, hydrological, hydrogeological and geotechnical data in order to compile Phase 1 Desk Study reports, Phase 2 Site Investigation reports, interpretive reports and factual reports.
- Contaminated Land Investigations across the UK in accordance with the Land contamination risk management and BS10175:2011 including Generic Qualitative Risk Assessment and Detailed Quantitative Risk Assessment.
- The assessment of soil and water contamination data using statistical and geospatial methods
- The collation of both toxicological data and fate and transport parameters to allow the derivation of in-house GAC's and SSAC's
- Formed part of the group that worked on the LQM/CIEH publication 'Generic Assessment Criteria for Human health Risk Assessment 2nd Edition'
- Derived the Demeter Environmental Tier 1 GAC's for human health
- Adept at undertaking quantitative risk assessments using CLEA, BP RISC, RBCA, EA P20 worksheets
- Projects include;
 - Numerous combined Phase 1 / Phase 2 Site investigation Reports across the UK ;
 - Site investigation for a proposed hotel site within a site determined as 'Contaminated Land' under Part 2A;

- Assessment of environmental liabilities for the urban regeneration of Ordsall, Salford and the Primrose Bank and Crossley Estates, Oldham;
- Numerous pre purchase audits for property transactions;
- Redevelopment of a former secondary school in Skelmersdale;
- Redevelopment of a former scrapyard and gas works in Rivulet Road, Wrexham;
- Redevelopment of numerous service stations.
